VOLUME 19

MELBOURNE
1966

AUSTRALIAN JOURNAL OF BIOLOGICAL SCIENCES

A medium for the publication of results of original scientific research in the biological sciences with special emphasis on the experimental phases. Volumes 1 to 5 issued as the Australian Journal of Scientific Research, Series B: Biological Sciences.

Published by the Commonwealth Scientific and Industrial Research Organization.
Issued six times a year, \$A4 per annum.

BOARD OF STANDARDS

The Board of Standards for this Journal is appointed by the Commonwealth Scientific and Industrial Research Organization and the Australian Academy of Science and consists of Professor N. S. Bayliss (Chairman), Mr. A. E. Scott (Editor-in-Chief), Professor G. H. Satchell, Professor R. Street, Professor J. S. Turner, and Professor E. J. Underwood.

ADVISORY COMMITTEE

Acceptance of papers for this Journal is in the hands of an Advisory Committee appointed by the Board of Standards and consisting of Mr. A. E. Scott (Editor-in-Chief and Chairman), Dr. M. F. Day, Professor C. W. Emmens, Dr. L. T. Evans, Professor R. N. Robertson, Professor G. H. Satchell, and Professor J. S. Turner.

All enquiries and manuscripts should be forwarded to:

The Editor-in-Chief,
Editorial and Publications Section, CSIRO,
Sixth Floor,
372 Albert Street,
East Melbourne, C.2, Victoria

CONTENTS

NUMBER 1, FEBRUARY 1966

	PAGE
Movement of previously deposited ^{45}Ca in subterranean clover (<i>Trifolium subterraneum</i> L.) by foliar injections of certain cations. By C. R. Millikan and B. C. Hanger	1
The distribution of photosynthate within lucerne as influenced by illumination. By K. C. Hodgkinson and J. A. Veale	15
Some salt-uptake and tissue-aging phenomena studied with cultured tobacco cells. By A. R. Bellamy and R. L. Bielecki	23
Divalent cation absorption and interaction in <i>Atriplex</i> . By C. B. Osmond ..	37
Subcellular organization of the developing cotyledons of <i>Pisum sativum</i> L. By Joan M. Bain and F. V. Mercer	49
Subcellular organization of the cotyledons in germinating seeds and seedlings of <i>Pisum sativum</i> L. By Joan M. Bain and F. V. Mercer	69
The relationship of the axis and the cotyledons in germinating seeds and seedlings of <i>Pisum sativum</i> L. By Joan M. Bain and F. V. Mercer ..	85
The reflection of visible radiation from leaves of some Western Australian species. By G. I. Pearman	97
On the nitrogen nutrition of silage strains of lactic acid bacteria. By C. J. Brady	105
The redistribution of nitrogen in silage by lactic-acid-producing bacteria. By C. J. Brady	123
The response to artificial selection due to autosomal genes of large effect. III. The effects of linkage on the rate of advance and approach to fixation in finite populations. By B. D. H. Latter	131
Variation of scutellar bristles in <i>Drosophila</i> . XII. Selection in <i>scute</i> lines. By A. S. Fraser	147
The pattern of abdominal microchaetae in <i>Drosophila</i> . By Nancy V. Johnston	155
The oxidative utilization of fructose and acetate by washed ram spermatozoa in the presence or absence of potassium and magnesium. By R. G. Wales and T. O'Shea	167
The fallopian tube of the sheep. I. Cannulation of the fallopian tube. By B. J. Restall	181
The fallopian tube of the sheep. II. The influence of progesterone and oestrogen on the secretory activities of the fallopian tube. By B. J. Restall ..	187
The metabolism of ram spermatozoa in the presence of genital fluids of the ewe. By R. G. Wales and B. J. Restall	199
Products of metmyoglobin oxidation at acid pH. By N. K. King and M. E. Winfield	211

NUMBER 2, APRIL 1966

	PAGE
Physical environment and symbiotic nitrogen fixation. III. Root temperature effects on shoot and root development and nitrogen distribution in <i>Trifolium subterraneum</i> . By A. H. Gibson	219
Inflorescence initiation in <i>Lolium temulentum</i> L. VIII. Histochemical changes at the shoot apex during induction. By R. B. Knox and L. T. Evans ..	233
Use of carbohydrate reserves during growth from cuttings of grape vine. By M. S. Buttrose	247
Uptake of potassium and sodium by seedlings of <i>Sinapis alba</i> . By M. G. Pitman	257
Some metabolic implications of the Tris effect in beetroot tissue. By R. F. M. Van Steveninck	271
Further aspects of the Tris effect in beetroot tissue during its lag phase. By R. F. M. Van Steveninck	283
The sulphhydryl-disulphide hypothesis in relation to desiccation injury of cabbage leaves. By D. F. Gaff	291
Correlations between relatives when intermediates are fittest. By J. W. James	301
Effects of selection and linkage on degree of inbreeding. By J. L. Gill and B. A. Clemmer	307
A study of the proteins of the wool follicle. By A. M. Downes, K. A. Ferguson, J. M. Gillespie, and B. S. Harrap	319

Short Communications

The roles of riboflavin and inhibitors in conidial germination in <i>Peronospora tabacina</i> Adam. By C. J. Shepherd and L. Tosic	335
The demonstration of antibodies in the intestinal mucus of sheep infected with <i>Oesophagostomum columbianum</i> by means of the percutaneous anaphylaxis test. By C. Dobson	339

NUMBER 3, JUNE 1966

Sodium and potassium transport in the marine alga <i>Chaetomorpha darwinii</i> . By W. A. Dodd, M. G. Pitman, and K. R. West	341
The efflux of chloride from cells of <i>Nitella</i> and <i>Chara</i> . By A. B. Hope, A. Simpson, and N. A. Walker	355
Metabolic effects on ion fluxes in <i>Nitella translucens</i> . I. Active influxes. By Enid A. C. MacRobbie	363
Metabolic effects on ion fluxes in <i>Nitella translucens</i> . II. Tonoplast fluxes. By Enid A. C. MacRobbie	371
The electrical measurement of chloride fluxes in <i>Nitella</i> . By D. S. Mailman and L. J. Mullins	385

NUMBER 3, JUNE 1966 (*Continued*)

	PAGE
Water permeability of a characean internodal cell with special reference to its polarity. By M. Tazawa and N. Kamiya	399
A mechanism for the origin of specifically oriented textures in development with special reference to <i>Nitella</i> wall texture. By P. B. Green and A. King	421
The structure and plastic properties of the cell wall of <i>Nitella</i> in relation to extension growth. By M. C. Probine and N. F. Barber	439
Solutions of the field equations in the fixed-charge model of cell membranes. By E. P. George and R. Simons	459
The effect of photoperiod duration upon the respiratory activity of the roots of wheat seedlings. By T. F. Neales and J. A. Davies	471
The effect of temperature on the development of <i>Sericesthis</i> iridescent virus. By M. F. Day and M. L. Dudzinski	481
<i>Short Communications</i>	
The uptake of L-lactate and D-glucose by the mammary gland of the cow. By P. E. Hartmann	495

NUMBER 4, AUGUST 1966

The carbohydrate requirements for symbiotic nitrogen fixation: a "whole-plant" growth analysis approach. By A. H. Gibson	499
Effects of day length and light intensity on growth of barley. IV. Genetically controlled variation in response to photoperiod. By D. Aspinall	517
Decapitated peas and diffusible gibberellins. By D. Cohen, J. B. Robinson, and L. G. Paleg	535
Chloride in cells of <i>Chara australis</i> . By H. G. L. Coster	545
Isolation, purification, and some properties of two viruses from cultivated <i>Cymbidium</i> orchids. By R. I. B. Francki	555
Isolation and properties of a DNA-containing rod-shaped bacteriophage. By R. A. Panter and R. H. Symons	565
Heterosis and selection in the domestic fowl. By J. A. Morris and F. E. Binet ..	575
The genotypic control of longevity in <i>Drosophila melanogaster</i> under two environmental regimes. By P. A. Parsons	587
Influence of sex on selection. II. Contributions of autosomal genotypes having different values in the two sexes. By B. Griffing	593
Relationship between cyclic changes in the hair follicle and sweat gland size in cattle. By A. V. Schleger	607
Metabolism of coumaphos in larvae of the cattle tick <i>Boophilus microplus</i> . By W. J. Roulston, C. A. Schuntner, and H. J. Schnitzerling	619

NUMBER 4, AUGUST 1966 (*Continued*)

	PAGE
The effect of oil-feeding and starvation on the composition and output of lipid in thoracic duct lymph in the lactating cow. By P. E. Hartmann, J. G. Harris, and A. K. Lascelles	635
Diluents for the preservation of ram spermatozoa. I. Diluents used at 37°C and 5°C containing casein. By I. C. A. Martin	645
The use of monosaccharides, disaccharides, and trisaccharides in synthetic diluents for the storage of ram spermatozoa at 37°C and 5°C. By K. R. Lapwood and I. C. A. Martin	655
Histological observations on the reproductive tract of the ewe. By B. J. Restall	673
The fallopian tube of the sheep. III. The chemical composition of the fluid from the fallopian tube. By B. J. Restall and R. G. Wales	687
Comparison of similar protein components isolated from wool and wool roots. By R. Frater	699

Short Communications

Some effects of temperature on carbohydrate utilization and plant growth. By R. L. Burt	711
Fungal cellulases. XIV. The synthesis of pentafluorophenyl β -D-glucopyranoside and its interaction with β -glucosidase and the β -glucosidase induction system in <i>Stachybotrys atra</i> . By M. A. Jermyn	715

NUMBER 5, OCTOBER 1966

Effects of day length and light intensity on growth of barley. V. Response by plants in the field to night interruption. By L. G. Paleg and D. Aspinall ..	719
Comparative effects of ammonium or sodium added to substrates low in calcium, on the distribution of ^{45}Ca in subterranean clover. By C. R. Millikan and B. C. Hanger	733
Plant response to saline substrates. VIII. Regulation of ion concentrations in salt-sensitive and halophytic species. By H. Greenway, A. Gunn, and D. A. Thomas	741
Spectral energy relations of isobilateral leaves. By J. A. Howard	757
Differential reactions to three strains of wheat powdery mildew (<i>Erysiphe graminis</i> var. <i>tritici</i>). By R. A. McIntosh and E. P. Baker	767
Influence of sex on selection. III. Joint contributions of sex-linked and autosomal genes. By B. Griffing	775
Simultaneous selfing and partial diallel test crossing. III. Optimum selection procedures. By C. Clark Cockerham and D. F. Matzinger	795
Variation of scutellar bristles in <i>Drosophila</i> . X. Selection limits. By W. R. Scowcroft	807

NUMBER 5, OCTOBER 1966 (*Continued*)

	PAGE
Distribution of transferrin, albumin, post-albumin, amylase, and haemoglobin genotypes in Droughtmaster cattle. By G. C. Ashton, J. Francis, and J. B. Ritson	821
Changes in the concentration of lipids and some other constituents in the blood plasma of calves from birth to 6 months of age. By A. D. Shannon and A. K. Lascelles	831
The effects of cryptorchism in the guinea pig on the isoenzymes of testicular lactate dehydrogenase. By A. W. Blackshaw and J. I. Samisoni ..	841
The respiration of the rabbit epididymis and its synthesis of glycerylphosphorylcholine. By J. C. Wallace, R. G. Wales, and I. G. White	849
Factors affecting the metabolism of acetate and glucose by ram and bull spermatozoa. By R. N. Murdoch and I. G. White	857
Effect of casein, lecithin, glycerol, and storage at 5°C on diluted ram and bull semen. By T. O'Shea and R. G. Wales	871
The fallopian tube of the sheep. IV. The metabolism of ram spermatozoa in the presence of fluid from the fallopian tube. By B. J. Restall and R. G. Wales	883
The effect of stem rust infection on the soluble proteins of wheat leaves. By C. W. Wrigley and H. L. Webster	895
Fungal cellulases. XV. Acceptor specificity of the aryl β -glucosidase of <i>Stachybotrys atra</i> . By M. A. Jermyn	903
Fungal cellulases. XVI. Alkane-1, ω -diols as acceptors for the β -glucosidase of <i>Stachybotrys atra</i> . By M. A. Jermyn	919
Fungal cellulases. XVII. The behaviour of t-butyl alcohol, pinacol, and methanol as acceptors for the β -glucosidase of <i>Stachybotrys atra</i> . By M. A. Jermyn ..	927
Fungal cellulases. XVIII. Ethyl L-lactate as an acceptor for the β -glucosidase of <i>Stachybotrys atra</i> . By M. A. Jermyn	935

Short Communications

Chromosome location of mature plant leaf rust resistance in Chinese Spring wheat. By R. A. McIntosh and E. P. Baker	943
Competition between males in the determination of mating speed in <i>Drosophila pseudoobscura</i> . By D. Kaul and P. A. Parsons	945

NUMBER 6, DECEMBER 1966

	PAGE
The physiology of growth in the wheat plant. III. Growth of the primary shoot and inflorescence. By R. F. Williams	949
Effect of actinomycin D and 2-thiouracil on floral induction and nucleic acid synthesis in the bud in <i>Chenopodium amaranticolor</i> . By J. D. Watson and R. E. F. Matthews	967
Evidence for the widespread occurrence of induced respiration in slices of plant tissues. By T. ap Rees	981
Calcium and magnesium uptake by barley seedlings. By N. Lazaroff and M. G. Pitman	991
Effects of the environment of the mother plant on germination by control of seed-coat permeability to water in <i>Ononis sicula</i> Guss. By M. Evenari, D. Koller, and Y. Gutterman	1007
A study of the surface wax deposits on apple fruit. By D. M. Hall	1017
The fine structure of the mycorrhizas of <i>Pinus radiata</i> D. Don. By R. C. Foster and G. C. Marks	1027
A second gene controlling allelic recombination in <i>Neurospora crassa</i> . By D. G. Catcheside	1039
Behaviour of flanking markers in allelic crosses. By D. G. Catcheside	1047
Sex-linked and maternal effects in the diallel cross. By E. J. Eisen, B. B. Bohren, and H. E. McKean	1061
Observations on moulting of fourth-stage larvae of <i>Paratylenchus nanus</i> . By J. M. Fisher	1073
Changes in the relative amounts of soluble protein and amino acid in the haemolymph of the locust, <i>Chortoicetes terminifera</i> Walker (Orthoptera: Acrididae), in relation to dehydration and subsequent hydration. By Taty Djajakusumah and P. W. Miles	1081
The transport of spermatozoa in the rabbit doe before and after ovulation. By K. E. Turnbull	1095
The metabolism of tritiated testosterone by a wether. By W. B. Osborne, P. K. Wong, and J. L. Garnett	1101
The disulphide and sulphydryl content of fractions prepared by the ultracentrifugation of doughs made from wheat flour. By C. M. Mauritzen and P. R. Stewart	1111
The incorporation of [³⁵ S]cysteine into the proteins of dough by disulphide-sulphydryl interchange. By P. R. Stewart and C. M. Mauritzen	1125

NUMBER 6, DECEMBER 1966 (*Continued*)

	PAGE
The preparation of the A and B chains from reduced and <i>S</i> -carboxymethylated beef insulin. By E. O. P. Thompson and I. J. O'Donnell	1139
Fungal cellulases. XIX. Polyhydroxylic acceptors for the β -glucosidase of <i>Stachybotrys atra</i> . By M. A. Jermyn	1153
<i>Short Communications</i>	
Phosphate incorporation by sterile and non-sterile plant roots. By A. D. Rovira and G. D. Bowen	1167
Association between serum alkaline phosphatase variants and the <i>R-O-i</i> blood group system in the Australian Merino. By R. M. Hope ..	1171
Serum transferrins of twin sheep-goat hybrids. By D. W. Cooper, L. F. Bailey, G. Alexander, and D. Williams	1175
Variation in the sulphur content of wool of Merino sheep associated with genetic differences in wool-producing capacity. By L. R. Piper and C. H. S. Dolling	1179
Index to Volume 19	1183
